Pada challenge ini, diberikan sebuah file dan diminta untuk menemukan flag yang terdapat di dalam file tersebut tanpa menjalankan file.

Pertama, file challenge diunduh dengan perintah wget.

Kemudian, menggunakan perintah ls digunakan untuk melihat daftar file

Setelah terlihat bahwa file strings sudah ada, gunakan perintah cat untuk membaca isi file strings

## Challenge: Log Hunt

### Log Hunt

General Skills **Easy**

by Yahaya Meddy · 📁 picoMini by CMU-Africa

Our server seems to be leaking pieces of a secret flag in its logs. The parts are scattered and sometimes repeated. Can you reconstruct the original flag? Download the [logs](#) <sup>↗</sup> and figure out the full flag from the fragments.

HINTS ⓘ

- 1 You can use **grep** to filter only matching lines from the log.
- 2 Some lines are duplicates; ignore extra occurrences.

Pada challenge ini, sebuah file log bernama server.log diberikan dan di dalamnya terdapat beberapa potongan dari sebuah flag.

Pertama, unduh file menggunakan perintah `wget`.

Gunakan perintah `ls` untuk melihat daftar file.

File server.log berhasil diunduh, kemudian gunakan perintah `cat` untuk membuka isi file.

```

Selanjutnya kita coba jalankan program dengan ./warm

Muncul pesan permission denied menandakan kita perlu izin untuk menjalankan program tersebut

Gunakan perintah chmod dengan opsi +x (Perintah chmod digunakan untuk mengubah permission suatu file, sedangkan +x memberikan execute permission kepada file tersebut)

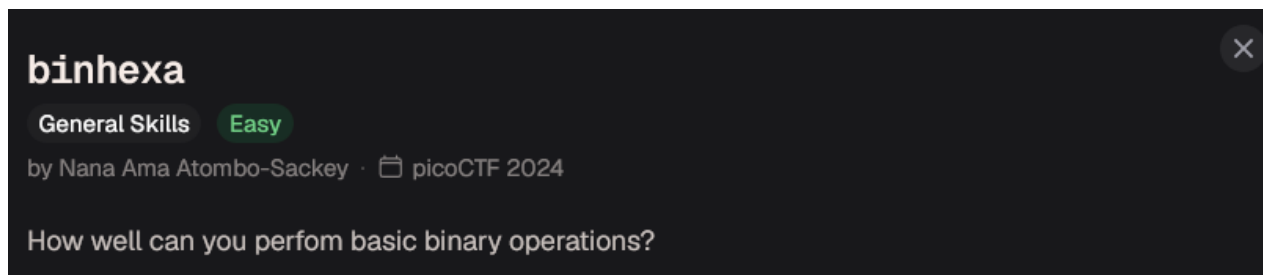

Kemudian, coba jalankan lagi program dengan ./warm

Program menampilkan pesan yang berisi untuk menggunakan perintah -h

Setelah menggunakan perintah ./warm -h, pesan menampilkan flag yang dicari

## Challenge: Binhexa

Challenge tersebut menguji pemahaman dasar mengenai operasi bilangan biner.

Pertama, jalankan perintah `nc xebec.cylabacademy.net 48046` yang diberikan oleh challenge tersebut.

Kemudian, diberikan 2 bilangan biner yaitu Binary Number 1 dan Binary Number 2. Terdapat beberapa soal yang perlu kita jawab sesuai perintah yang diberikan

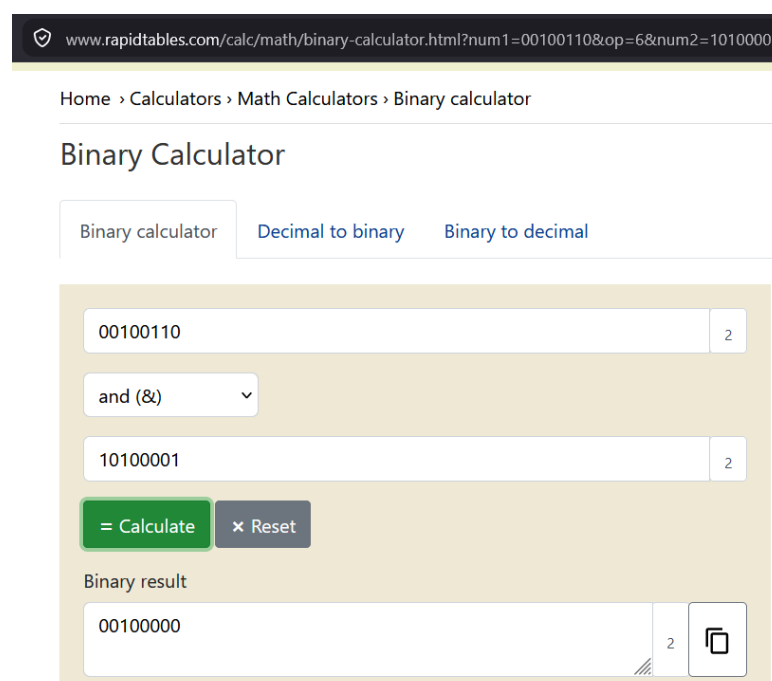

```
arkacflow@Azure-Bloo:~$ nc xebec.cylabacademy.net 48046
Welcome to the Binary Challenge!
Your task is to perform the unique operations in the given order and find the final result in hexadecimal that yields the flag.

Binary Number 1: 00100110
Binary Number 2: 10100001

Question 1/6:
Operation 1: '&'
Perform the operation on Binary Number 1&2.
Enter the binary result: 00100000
Correct!

Question 2/6:
Operation 2: '<<'
Perform a left shift of Binary Number 1 by 1 bits.
Enter the binary result:
```

Kita dapat menggunakan suatu binary calculator untuk membantu kita dalam menjawab soal-soal tersebut.

```
Question 2/6:
Operation 2: '<<'
Perform a left shift of Binary Number 1 by 1 bits.
Enter the binary result: 1001100
Correct!

Question 3/6:
Operation 3: '*'
Perform the operation on Binary Number 1&2.
Enter the binary result: 1011111100110
Correct!

Question 4/6:
Operation 4: '|'
Perform the operation on Binary Number 1&2.
Enter the binary result: 10100111
Correct!

Question 5/6:
Operation 5: '+'
Perform the operation on Binary Number 1&2.
Enter the binary result: 11000111
Correct!

Question 6/6:
Operation 6: '>>'
Perform a right shift of Binary Number 2 by 1 bits .
Enter the binary result: 1010000
Correct!

Enter the results of the last operation in hexadecimal: 50

Correct answer!
The flag is: academy{b1tw^3se_0p3eR@tI0n_su33essFuL_e453a847}
```

Setelah menjawab soal-soal tersebut dengan bantuan binary calculator, akhirnya muncul flag yang dicari.

FLAG: academy{b1tw^3se\_0p3r@t10n\_su33essFuL\_e453a847}

## Challenge: MultiCode

### MultiCode

General Skills Easy

by Yahaya Meddy · picoCTF 2026

We intercepted a suspiciously encoded message, but it's clearly hiding a flag. No encryption, just multiple layers of obfuscation. Can you peel back the layers and reveal the truth? Download the [message](#).

HINTS

- 1 The flag has been wrapped in several layers of common encodings such as ROT13, URL encoding, Hex, and Base64. Can you figure out the order to peel them back?
- 2 A tool like CyberChef can be interesting.

Challenge ini merupakan challenge yang menggunakan beberapa lapisan encoding untuk menyembunyikan sebuah flag.

Pertama, unduh file dengan perintah wget

Kemudian cek jika file sudah terunduh dengan ls untuk menampilkan daftar file

Gunakan perintah cat untuk membuka isi file tersebut

Terlihat beberapa rangkaian karakter yang kita harus decode

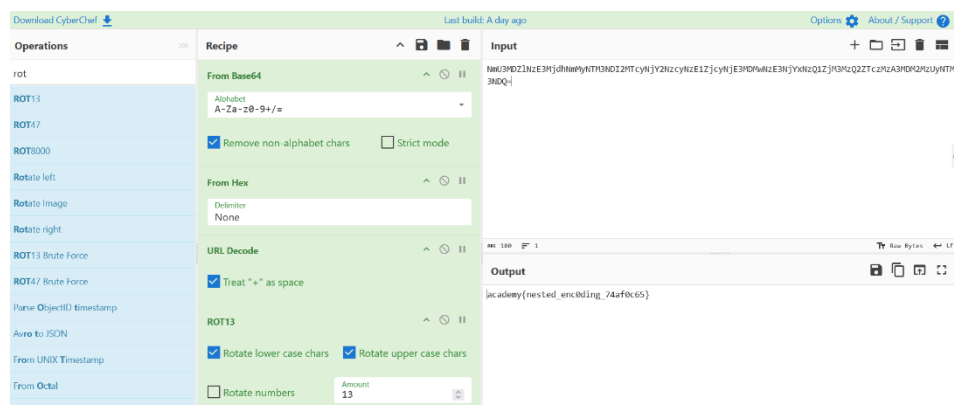

```
arkacflow@Azure-Bloo:~/cylabCTF/multicode$ wget https://challenge-files.cylabacademy.net/library/c3ba15daad71c2f215d6e6db4a6d4c70a4696eef42dd338372287cc4d2a6268e/message.txt

Kita dapat menggunakan CyberChef untuk melakukan proses decoding tersebut

Dengan bantuan hint, beberapa operasi yang digunakan adalah From Base64, From Hex, URL Decode, dan ROT13 dan flag berhasil ditemukan.

Using a Secure Shell (SSH) is going to be pretty important. Can you **ssh** as **ctf-player** to **xebec.cylabacademy.net** at port **34889** to get the flag?

You'll also need the password **fd7746b4**. If asked, accept the fingerprint with **yes**.

If your device doesn't have a shell, you can use: <https://webshell.cylabacademy.org> ↗

If you're not sure what a shell is, check out our Primer:

INSTANCE ⓘ

Challenge ini meminta kita menggunakan SSH (Secure Shell) untuk terhubung ke server `xebec.cylabacademy.net` sebagai user `ctf-player` melalui port `34889`.

Pertama, gunakan username, alamat server, dan port yang diberikan  
Kemudian challenge meminta untuk menerima fingerprint dengan `yes`  
Masukkan password yang diberikan oleh challenge (`fd7746b4`)  
Setelah berhasil masuk, muncul flag yang dicari.

After logging in, you will find multiple file parts in your home directory. These parts need to be combined and extracted to reveal the flag. SSH to `chatelaine.cylabacademy.net:23624` and login as `ctf-player` with password `d137d16e`.

Challenge ini memberikan beberapa bagian file yang perlu kita gabung untuk mendapatkan flag.

Pertama, lakukan koneksi ke server dengan informasi yang diberikan oleh challenge (ssh ctf-player@chatelaine.cylabacademy.net -p 23624)

Terima fingerprint dengan yes

Gunakan perintah ls untuk melihat daftar file yang tersedia

Terdapat instruksi yang bisa dibaca dengan perintah cat instructions.txt

Kita diberitahu bahwa lag telah dipecah menjadi beberapa bagian sebagai file ZIP dan kita perlu gabungkan mereka.

Jalankan cat part\_\* >> flag.zip untuk menggabungkan file-file tersebut.

Gunakan ls untuk memastikan flag.zip sudah ada

Ekstrak file ZIP dengan perintah unzip flag.zip

Setelah berhasil, muncul file flag.txt yang kita bisa buka isinya dengan perintah cat flag.txt dan akhirnya flag yang dicari ketemu
